SANUSI ADAMU
Q28 Adamawa Street kinkinau, Kaduna South, Kaduna State, Nigeria |08035145286, 09152446301, yaradua36@hotmail.com

---

PERSONAL DATA

Date of birth:	**4th February, 1985**
State of Origin:	**Nasarawa**
Local Government:	**Toto**
Marital Status:	**Married**
Sex:	**Male**

Professional Summary

Highly skilled **Senior Ammonia Field Operator** with over 4 years of progressive experience in ammonia plant operations. Demonstrated expertise in field supervision, troubleshooting, startup and shutdown activities, and safety compliance. Adept in coordinating with DCS and maintenance teams to ensure smooth, efficient, and safe operations of critical equipment such as reformers, CO_2 removal units, refrigeration compressors, and shift converters. Proven leadership in mentoring junior operators and optimizing plant performance.

Core Competencies

- Ammonia Production Process
- Primary Reformer & Secondary Reformer Operation
- CO_2 Removal Section (aMDEA)
- Refrigeration & Compression Systems
- Steam and Condensate Systems
- Startup and Shutdown Procedures
- Equipment Troubleshooting
- Field Monitoring and Log Keeping
- Safety and Permit to Work (PTW) Systems
- Turnaround Support
- DCS interface and Emergency Handling

Professional Experience

Dangote Fertilizer Limited – Lagos, Nigeria
Senior Ammonia Field Operator
Jan 2025 – Present

- Supervise field operations in ammonia production, ensuring safe and efficient plant performance.
- Perform safe and efficient field operations of ammonia production unit, including routine rounds, equipment monitoring and local adjustment if there is any deviation.
- Lead the field team during startups, shutdowns, and emergency situations, coordinating closely with the control room.
- Maintaining good housekeeping and ensuring good safe and accessible walk ways and equipment areas.
- Participate in emergency responses, drills and equipment isolation when required.
- Support permit to work issuance, job hazard analysis JHA preparation and field verification prior to issuance.
- Adhere to all safety, environmental, and product handling protocols during loading activities.
- Monitor storage tank levels, temperature and pressure and ensure readiness for loading Operations.
- Applying Lockout/Tag out (LOTO) Procedures in executing isolations for maintenance.
- Monitor storage tank levels, temperature and pressure and ensure readiness for loading Operations.
- Assist in start-up and shutdown operations of the ammonia unit by executing field task according to approved procedures and in coordination with the control room.
- Diagnose field equipment issues and coordinate with maintenance for corrective actions.
- Train and mentor junior operators on SOPs, safety practices, and plant troubleshooting.
- Implement and enforce safety procedures, and ensure compliance with all PTW systems.
- Log critical parameters, maintain accurate records, and report anomalies to engineering and supervisory teams.

Dangote Fertilizer Limited, Lagos, Nigeria
Ammonia Field Operator
August 2021 – January 2025

- Operate and monitor field equipment in the ammonia section, including reformers, shift converters, CO_2 removal system, and refrigeration loop.
- Operate Manual valves, local instruments and equipment in coordination with DCS and shift supervisor.

- Conduct routine field inspections, record readings, and promptly report equipment abnormalities.
- Collect process and utility samples as required and communicate deviations to the control room.
- Conduct regular field rounds to inspect equipment for abnormalities, leaks, and vibrations.
- Applying Lockout/Tag out (LOTO) Procedures in executing isolations for maintenance.
- Adhere to all safety, environmental, and product handling protocols during loading activities.
- Assist in start-up and shutdown operations of the ammonia unit by executing field task according to approved procedures and in coordination with the control room.
- Ensure safe handling of chemicals used in steam drums and water treatment.
- Monitor storage tank levels, temperature and pressure and ensure readiness for loading Operations.
- Maintain effective communication with DCS panel operators for smooth operations.
- Follow safety standards and contribute to plant HSE.
- Monitoring & inspection of all instruments, checking all the control valves for any hunting, gland leak, instrument air leak etc. comparing the local gauge reading with respective transmitters and if there is any deviation or abnormalities, informs to panel operator to raise the work order.
- To maintain effective communication with seniors and supervisory staff to ensure that accurate condition of field equipment is passed on.
- Prepares equipment for maintenance and re-commission when completed.
- Co-ordination with various maintenance departments such as mechanical, instruments and electrical in carrying out maintenance activities.

Bilal Ibnu Rabah International Academy, Kaduna
Examinations Officer
August 2016– July 2021

- Coordinated all internal and external examination processes in line with national education policies.
- Prepared and issued examination time tables to departments and candidates.
- Ensured proper storage and confidentiality of examination papers and scripts.
- Supervised and trained invigilators to maintain exam integrity.
- Handled post-examination processes including collation, verification, and result dissemination.
- Liaised with regulatory bodies (e.g. for external exams)

Kaduna Refining and Petrochemical Company, KRPC Kaduna
INTERNSHIP
September 2012- November 2012

- Learning How to Operate Equipment in the Field
- Understanding the Naphtha Hydrotreating Unit (NHU)
- Understanding the Catalytic Cracking Unit (CRU)
- Understanding the Sulfur Recovery Unit (SRU)

Education

B. Eng. Chemical Engineering, *Ahmadu Bello University, Zaria* **2014**
SSCE Certificate, *Victory Academy, Kakuri, Kaduna south, Kaduna State* **2004**
Primary Certificate, *Victory Academy Kakuri, Kaduna south, Kaduna State* **1998**

Trainings

- HSE**,** Kaduna Refining and Petrochemical Company, KRPC Kaduna, **2012**
- Permit to Work (PTW) Training
- First Aid and Fire Safety
- Technical Training on Ammonia Plants at Dangote Fertilizer Limited (DFL), Lagos, Nigeria **2021.**
- Time Management and its impact on Productivity at Joe Fine Consultants, Lagos, Nigeria **2025.**

Technical Skills

- DCS (Yokogawa)
- MS Office
- Decision making ability and leadership skills.
- Excellent Communication skills

Achievements

- Played a key role in start-up of Dangote Ammonia Plant (Train 2).
- Successfully monitored Ammonia Converter Catalyst Loading and Unloading.
- Successfully Monitored LTS catalyst reduction with Vendors supervision.
