ABOUT ME

Software developer with strong skills in Java, Spring Boot, and RESTful API design. Experienced in building web applications that improve workflows and efficiency, with a focus on clean architecture, maintainable code, and scalable solutions.

SKILLS

- **Programming Languages:** Java (Core & Advanced), JavaScript
- **Frameworks & Libraries:** Spring Boot, Spring Web, Spring Data JPA, Servlets, JSP, Lombok, Map Struct, Apache POI
- **Web Technologies:** HTML, CSS, Bootstrap
- **Database & Persistence:** MySQL, H2, JDBC (Full CRUD, Complex Queries), Transactions, Caching, Hikari
- **Design Patterns:** Singleton, Factory, MVC
- **API & Integration:** RESTful API Design, Postman, Java Mail API (Email Automation), Apache POI (Excel Integration)
- **Validation:** Client-side & Server-side Form Validation
- **Tools & Version Control:** IntelliJ IDEA, VS Code, Git, GitHub
- **Architecture & AOP:** Spring AOP, MVC Architecture
- **Documentation & Testing:** Swagger/Open API

EXPERIENCE

Software Intern, X-Workz ODC, Bangalore *- Feb 2025 - Current*

- Learned and applied Java, Spring, Spring Boot, MVC, JDBC, and JPA through hands- on practice projects.
- Built RESTful APIs with Spring Boot to understand efficient frontend- backend communication.
- Explored Git version control and branching strategies to manage code effectively.
- Designed a sample Vendor Management Web Application using Spring MVC as part of self- learning.

EDUCATION

BE (CSE) – Shree Devi Institute OF Technology, Mangalore *– dec 2021 – June 2025*
CGPA – 8.2

PUC – SR PU College, Hebri *– 2019 – 2021*
Percentage – 90%

PROJECTS

TECHROUTE – VENDOR MANAGEMENT WEB APPLICATION

- Developed a full- stack web application using **Spring MVC** to manage vendors, users, and admins.

- Implemented **pagination** for efficient data handling and user experience.
- Added **role- based access (Admin/User)** with validation and encryption for secure workflows.
- Integrated **Swagger** for API documentation and **Postman** for testing endpoints.
- Built **schedulers** for automated tasks and **mail integration** for notifications.
- Designed database interactions with **SQL, JDBC, and JPA**, supporting CRUD operations and complex queries.
- Used **JSP and JavaScript (Axios)** for client- side validations and responsive UI.

TECHNICAL SUMMARY

- **Programming Languages:** Proficient in Core and Advanced Java with a strong understanding of OOP principles (Abstraction, Encapsulation, Inheritance, Polymorphism), type casting, exception handling, access modifiers, JVM internals, and memory management. Skilled in JavaScript for client- side interactivity.
- **Web Technologies:** Experienced in building responsive UIs using HTML, CSS, Bootstrap, and JavaScript, with both client- and server- side validation.
- **Frameworks & Libraries:** Hands- on expertise with Spring Boot, Spring MVC, Spring Data JPA, JDBC, JSP, Servlets, Lombok, Map Struct, Apache POI, and Hikari for efficient application development.
- **Database Management:** Skilled in MySQL and H2 integration, executing complex queries, joins, stored procedures, transactions, caching, and full CRUD operations using JDBC and JPA.
- **Design Patterns & Architecture:** Familiar with Singleton, Factory, and MVC patterns for scalable and maintainable applications. Practical knowledge of MVC architecture and Spring AOP for modular cross- cutting concerns.
- **API & Integration:** Experienced in designing RESTful APIs, documenting endpoints with Swagger/Open API, and testing with Postman. Integrated Java Mail API for automated email workflows and Apache POI for Excel report generation.
- **Tools & Version Control:** Proficient with IntelliJ IDEA, VS Code, Apache Tomcat, Git, and GitHub for collaborative development and deployment.
- **Testing & Documentation:** Knowledge of API documentation practices.
- **Others:** Skilled in responsive UI design, dependency management, and applying security hygiene practices across applications.
