MOHAMMAD KAYOOM

Telecommunications Professional

mohd.kayoom1986@gmail.com

Vill & Post- Sereni, Raebareli, UP

+919415002958, +91 9990055875

Professional Summary:-

Telecom professional with 15.5+ years at Ericsson, specializing in 5G NR Base-band 6651 integration and 3500/700 MHz deployment. Experienced in BBU-6630 integration, RAN quality checks, and managing AIR 3219/2219/4432 RRUs. Skilled in LKF installation, software upgrades, and 3G/4G/5G RAN management using ENM, SMO, WinSCP, SFTP, and Secure CRT. Strong in alarm monitoring and troubleshooting for BSC/MSS APG-40 and RNC 3810 with regular backups and hardware maintenance.

Technical Skills with Tool :-

- **RAN Integration (5G/4G/3G/2G):** 5G NR BB-6651/6648 integration, 3500/700 MHz deployment, BBU-6630/5216 integration, carrier adds, NSB, site migration, upgrades & Nokia-to-Ericsson swaps.
- **Quality & Configuration:** BBU/AIR/RRU quality checks (AIR 3219, 2219, 4432), sector/cell configuration, TDD/FDD setup, RET/tilt/azimuth changes, RF/RI link setup.
- **Tools Expertise:** ENM, SMO, OSS, Citrix Nesa, AMOS, Moshell, WinSCP, SFTP, Secure CRT, Putty, WinFiol, OMT.
- **Troubleshooting:** VSWR, RSSI, fiber loss, GPS sync, link issues, gNB/RBS/NodeB alarms, HW/SW faults, BSC/MSS APG-40 & RNC 3810 alarm handling.
- **Software & Licensing:** LKF installation, node software upgrades, SEMI-ZTI, cell creation/deletion, script execution for parameters (PCI/TAC/Tilt/RSI/GNBID).
- **Performance & Optimization:** KPI analysis, traffic balancing, RTWP troubleshooting, coverage optimization, antenna tilt/azimuth optimization.
- **O&M & Maintenance:** BTS/NodeB/RBS operation, backups (AP/RNC), hardware replacements, preventive maintenance, outage handling & field coordination.
- **Reporting & Audits:** Network audits, post-integration reports, NAT log audits, dump collection (cell/PCI/TAC/XML/KGET), CSV generation & performance monitoring.
- **Global Experience**: Integration & rollout support across Africa, Europe, Thailand, Spain & Telstra projects.

WORK EXPERIENCES: -

Amdocs as a Pay Roll of Integer telecom services private limited **(01-12-2024 to 30-06-2-25)**

RAN Engineer III (AT&T)

- RAN Integration & support for 5G/LTE/UMTS/GSM including 5G New Site Build, Carrier Add, Site Migration, Commissioning,
- Decommissioning, Site upgrade, Nokia to Ericsson swap
- Integration & Support for AT&T Base-band Migration (BBU5216/BBU6630/BBU6648/RP6651), 5G NSB, troubleshooting, Pr-checks and post-check ks
- Nokia to Ericsson warm, cold or hot swap
- Produced and validated Methods of Procedures (MOP) for different configuration
- Troubleshot the alarm VSWR and RSSI, Fiber Loss, Fiber connection radio end and BBU end
- Traffic monitoring, parameter changes, lock/unlock sites, RET adjustment, and alarm troubleshooting and escalating unresolved issues to market PM

- Analysis of One Data primary KPIs, traffic balancing/layer management and Performed coverage optimization by antenna tilt and azimuth change
- 0timizat ion cell-level accessibility and retain-ability to reduce access failure

Ericsson Global India Pvt. Ltd.: RAN Integration Engineer // RJIO- 5G NR integration, SWDP -Location Noida: Duration 10 May ,2021 to 12 Jan- 2024

Key Responsibilities

- RJio 5G NR integration – BB-6651 & BB-6648 (3500 & 700 MHz bands)
- Quality check of BBU, AIR 3219 (B42), Radio 2219 (B28), and Processor 6651
- Pre- & post-health check analysis, troubleshooting, link rate & SFP production checking
- NAT log audit: VSWR, fiber loss, AMF, GPS sync, relink, cell issues, etc.
- Tracker maintenance with team SPOC coordination
- RAN Integration – 5G Zero-Touch, Auto-Provisioning, Baseline Execution, SCFT
- LKF file installation & License Key import through ENM
- Integration of new 5G sites on LSMR
- Node software upgrades, SEMI-ZTI, cell creation & deletion through ENM/CLI
- Alarm monitoring & troubleshooting via AMOS, Secure CRT
- Configuration of new sectors/cells, TDD & FDD configuration, RI link/port, RF branch, antenna groups, and RF ports
- Hardware reconfiguration, replacements, diagnostics (HW/SW faults), and sync issues (UPF, AMF packet loss)
- Alarm audit, dump collection & daily dump release (Network dump, Cell dump, XML, HW Inventory, PCI, TAC, Tilt, KGET)
- Script execution for sector add/delete, parameter changes (Tilt, PCI, RSI, TAC, GNBID, cellLocalId)
- Network audit reports, post-integration reports, CSV generation & performance monitoring
- Troubleshooting gNB alarms in live network & supporting optimization teams to improve KPIs
- Supporting Field/Backend/SCFT teams for lock/unlock, parameter changes & network improvements
- Log & dump collection for R&D issue resolution
- Expertise in software upgrades/updates on RAN nodes (RNCs, 3G/4G/5G Radio Base Stations)
- Performed integration & troubleshooting on BTSs, WRAN RNCs, NodeBs & supported software rollout in Africa, Europe, Thailand, Spain & Telstra projects
- Solution implementation, project scheduling & execution of SA/NSA certification activities
- Antenna swapping (FDD, TDD, Twin Beam) – Bharti Project
- LTE integration on BB-6630 – Bharti Project

Experience – Ericsson (12.5 Years) | BSNL UP East – 2G/3G/BSS | O&M, CNS, Managed Services
Roles: O&M Engineer | Customer Network Support | Managed Services
Technologies: Ericsson 2G (BTS 2964), 3G (RBS 3922/3967), BSC (APG40), RNC (3810), Node-B (3000 series)

Key Responsibilities

BTS / Node-B / RBS Operation & Maintenance

- Operation & maintenance of Ericsson BTS (2964) and Node-B from BSC/RNC sides.
- Troubleshooting & alarm rectification for BTS, RBS (3922/**39**67), and Node-B.
- Daily tracking of RBS faults, TRX blocking, and outage analysis to minimize downtime.
- Responsible for integration of GSM and WCDMA BTS.

BSC / RNC Managements

- Maintenance, administration & fault rectification of Ericsson BSC (APG40) and RNC 3810.
- RNC backups for preventive maintenance and software administration.
- Monitoring UTRAN (RNC & Node-B) performance using Business Object.
- Alarm rectification for BSC and RNC.
- Handling critical network issues with field teams & Ericsson support.

Commissioning & Upgrades

- Commissioning of:
    - Ericsson BTS 2964
    - Node-B (3000 series)
    - Ericsson 3G RBS 3922 (Indoor) and RBS 3967 (Outdoor)
- 3G Node (RNC & RBS) upgrades.
- Software upgrade of Node-B from P5 → P6.0 → P7.0.

Backup & System Administration

- Execution of CP & AP backups for APG40 C/4 (non-duplicated).
- Preventive maintenance backups of RNC and network nodes.

Network Quality, Analysis & Reporting

- Fetching and analyzing Network Quality Reports for 12 BSCs & 4 MSSs.
- Monitoring performance KPIs for UTRAN (RNC and Node-B).
- Customer complaint investigation and root-cause analysis.

Coordination & Field Operations

- Coordination with vendors for O&M activities.
- Planning & implementation of new BTS sites (2964) and BSC (APG40).
- Managing emergencies & critical outages.
- Providing solutions for all issues raised by the customer for Ericsson 2G/3G BSS systems.

ACADEMIC QUALIFICATION:

- High School (Std. 10th) || "Lal Bahadur Shastri Shahid Inter College, Raebareli".
- Intermediate (Std. 12th) || "Janta Vidyalaya Inter College, Raebareli".
- B.A. from Kanpur University
- Completed B-Tech (Electronics &Telecommunication) from J.R.N. Rajasthan Vidyapeeth university

LANGUAGE- Hindi and English
