EDUCATION

Raja Balwant Singh Management Technical Campus
Agra, Uttar Pradesh
Master of Computer Applications (Integrated) Expected Graduation, June 2026
CGPA: 7.2

PROFILE SUMMARY

Backend Developer | Java & Spring Framework | RESTful APIs | Full Stack Adaptable

Highly motivated Backend Developer with strong expertise in **Core Java, Advanced Java (JDBC, Servlet, JSP)**, and the Spring ecosystem including **Spring Boot** and **Spring Core**. Skilled in designing and building **RESTful APIs** and **backend logic** for scalable applications. Comfortable integrating front-end layers when needed, demonstrating flexibility across the stack. Committed to clean code practices, efficient database handling, and continuous learning of evolving technologies to deliver robust and maintainable software solutions.

SKILLS

- **Languages:** Java 8+
- **Frameworks:** Spring Boot, Spring Core, Spring MVC (Learning), Spring Data JPA, Hibernate
- **Databases:** Oracle, MySQL, MongoDB
- **Tools:** Maven, Gradle, JUnit, Mockito (Learning), Git
- **IDEs:** IntelliJ IDEA, Eclipse, VS Code
- **Others:** RESTful APIs, JDBC, Servlets, JSP, HTML/CSS, JavaFX, Tailwind CSS

PROJECTS

IntelliBot - Java-based RESTful APIs for AI Chatbot interactions **June 2025 - Current**

Technologies Used : Java 17 | Spring Boot | Ollama 3 | HTML 5 |Tailwind CSS
Key Features : Real-time chat with local LLM **|** Custom typing animation and auto-scroll
Impact :

- Handled real-time responses for 50+ simulated conversations,
- reducing latency by running LLM locally.

BillGen Utility - Local Java API for billing, user auth, and usage tracking **May – June 2024**

Technologies Used : Java 8 | Java Swing|JDBC |Oracle (database use) | iText API (for invoice generation)
Key Features : User authentication system (Login/Signup) **|** Admin dashboard to manage customers and billing **|** Meter number–based bill tracking **|** Secure and persistent data storage using Oracle.
Impact :

- Managed 100+ customer records securely, automating invoice generation for faster billing.

EmpTrack WebApp - Java servlet-based web API for employee operations **Nov – Dec 2024**

Technologies Used : Java 8 | Servlet | JSP | JDBC | HTML/CSS | Oracle (Database)
Key Feature : Add, Update, Delete, and View employee records **|** Role-based login (Admin/User) **|** JSP-based user interface **|** JDBC integration with oracle for persistent data **|** Modular code with reusable Servlet controllers **|** Clean separation between frontend (JSP) and backend logic (Servlets)
Impact :

- Performed CRUD operations on 200+ employee entries, improving data management efficiency.

OCRXpress - Java-based OCR extraction API **July – July 2024**

Technologies Used: Java 8 | JavaFX (for GUI) | Tesseract OCR (for image-to-text conversion)
Used Api : OCR - Tesseract (Tess4J) | webcam-capture.jar | GUI - Javafx
