OBJECTIVE

To contribute towards the growth of organization where I work through skills and other significant talents, all the while enhancing and updating my knowledge with the dynamically Changing world.

PROFILE SUMMARY

- 6+ Years of experience in Administration/Maintenance/Troubleshooting of Data infrastructure including Data Centre and Data Recovery Centre Environment.
- Expertise with Cisco Core switch 6800, 9500, Aggradation Switch 6800 Access Switch 2900,3850,4507,9300.
- Expertise in Cisco (Router, Switches, ASR 1001, 1002), Cisco vEdge 1000, 2000, Opengear IM7248, Cisco Wireless Controller 5250.
- Responsible for planning / designing / maintenance of Technology / Networking infrastructure.

EXPERIENCE

- Currently associated with **Legato Health Technologies LLP (An ANTHEM Company), Bangalore** as a **Sr. Network Engineer.**
- Worked with **Artaaj Events Pvt. Ltd.** as **Tech Support Executive** for **Data and Voice Project**.
- Worked with **IIHT as Network Administrator cum Trainer** at **Bangalore**.

Accomplishments

- **Mountain Mover Award** for setting up the complete Network infrastructure for new office with headcounts of ~2500 Employees.
- **Gem Award** for setting up the complete Network infrastructure for new office with headcounts of ~4000 Employees.

EXTRA CURRICULAR ACTIVITIES

- Member of Anti-Ragging Community on College.
- Campus Ambassador at Innovians Technology.
- Attended Workshop on Ethical Hacking In MNIT College, Jaipur.
- Attended and cleared the first level of Software Debugging organized by SGVU, JAIPUR.

ACADEMIC QUALIFICATION

- Bachelor of Technology (Computer Science Engineering) from SGVU,Jaipur 66%
- (10+2), CBSE Board from PCS, Patna.
- 10th, CBSE Board from PCS, Patna.

INTERPERSONAL SKILLS

- Good Adaptability with flare to learn new things.
- Ability to rapidly build relationship and setup trust.
- Honest, Confident and Determined.
- Ability to cope up with different situations.
- Quick learner and smart worker.

TECHNICAL EXPRETIES

- **CCNA & CCNP**

ROUTER: Working knowledge of Routing Technique, Installation, Configuration and Administration network technologies. Familiarity with Dynamic Routing Protocols (RIPv1, RIPv2, EIGRP, OSPF, BGP). Sound Understanding of OSI Model, TCP/IP Protocols suite (IP, ARP, ICMP, TCP, UDP, SMTP, FTP) .Working knowledge of Cisco IOS commands & Backup of Cisco IOS and Configuration file. Working knowledge on Cisco 6800, 9500, ASR 1001, 1002, and vEdge 1000, 2000 Series Router, Network Processing, Centralized and Distributive Network Connections. NAT-PAT, ACL (Standard/Extended and Named) Configurations.

SWITCH: Working knowledge on Cisco 2950, 3850, 4507, 9300 catalyst Switch & Inter-Vlan Routing setup Using Cisco 2950 catalyst Switch and Cisco 6800 & 9500 Router. Configuration & VLAN setup on Cisco 2950, 3850, 4507, 9300 catalyst Switch & Enabling VTP modes. Configuring the STP & RSTP.

WAN: PPP, Frame-Relay, and ISDN Configuration.

WAC: Expertise on Cisco wireless controller 5250 and access point 3802.

Cisco Prime: Expertise on Cisco Prime for implementation and configuration of wired and wireless infrastructure.

SPLUNK: Working knowledge on Splunk with collecting logs.

Wireshark: Working knowledge on Wireshark for troubleshooting and diagnostic of network devices.

Riverbed: Working knowledge on riverbed Steelhead CX-7070 for maximize the efficiency and performance of the networks and applications.

- **OS Platforms**

Windows XP, Windows 7, Windows 8, Windows 10, Ubuntu, Redhat, UnixWare etc.

PROJECTS UNDERTAKEN

Company: Legato Health Technologies LLP (An ANTHEM Company)
Duration: Currently Working (Since April 2018)
Technology : Cisco, Opengear, Bluecoat ,Symantec S400,G10
Role: Sr. Network Engineer
Key Responsibility:

- Responsible for end-to-end planning / designing / implementation and configuration of networking infrastructure(Cisco Core switch 6800, 9500, Aggradation Switch 6800 Access Switch 2900, 3850, 4507, 9300,ASR 1001,ASR 1002 , Cisco Wireless Controller 5250,Cisco AP's 3802).
- Responsible for end-to-end planning / designing / implementation and configuration of SDWAN (vEdge 1000, 2000).
- Responsible for planning / designing / implementation and configuration of **Opengear IM7248 for secure remote accessibility of Network devices.**
- Maintenance and Monitoring of 6X MPLS (1 Gig each) and 4X ISP (1 Gig Each).
- Responsible for planning / designing / implementation and configuration of **Point-to-Point** Link for redundancy as well as Brach office connection.

Project/Site Readiness:

- **Company: Legato Health Technologies LLP (An ANTHEM Company), Gar Tower - 9, Hyderabad**
  Duration: Project delivery Nov 2020.
  Key Responsibilities:
  - Requirement Analysis
  - Proposed Network Architecture/Design and Configurations.
  - BOQ/BOM Preparation
  - ISP's and multiple Vendor Management to streamline and ensure the project delivery ETA.
  - Manging Team size of 12 members to perform Technical Support, Migration, Infrastructure Management, Service Delivery and Operations Management.
  - Readiness of Avaya VoIP Infrastructure.

- **Company: Legato Health Technologies LLP (An ANTHEM Company), RGA Tech Park, Bangalore**
  Duration: Project delivery Feb 2020.
  Key Responsibilities:
  - Requirement Analysis.
  - Proposed Network Architecture/Design and Configurations.
  - BOQ/BOM Preparation.
  - ISP's and multiple Vendor Management to streamline and ensure the project delivery ETA.
  - Manging Team size of 8 members to perform Technical Support, Migration, Infrastructure Management, Service Delivery and Operations Management.
  - Readiness of Avaya VoIP Infrastructure.

- **Company: Legato Health Technologies LLP (An ANTHEM Company), Gar Tower 1 and 2, Hyderabad**
  Duration: Project delivery Dec 2018.
  Key Responsibilities:
  - Requirement Analysis
  - Proposed Network Architecture/Design and Configurations.
  - BOQ/BOM Preparation
  - ISP's and multiple Vendor Management to streamline and ensure the project delivery ETA.
  - Manging Team size of 2 members to perform Technical Support, Migration, Infrastructure Management, Service Delivery and Operations Management.
  - Readiness of Avaya VoIP Infrastructure.

- **Company: Legato Health Technologies LLP (An ANTHEM Company), Manyata Tech Park, Bangalore**
  Duration: Project delivery May 2018.
  Key Responsibilities:
  - Requirement Analysis
  - Proposed Network Architecture/Design and Configurations.
  - BOQ/BOM Preparation
  - ISP's and multiple Vendor Management to streamline and ensure the project delivery ETA.
  - Manging Team size of 2 members to perform Technical Support, Migration, Infrastructure Management, Service Delivery and Operations Management.
  - Readiness of Avaya VoIP Infrastructure.

ARTAAJ How are you doing?	**Company: Artaaj/Amartze events Pvt. Ltd.** **Duration :** June, 2016 to March, 2018 **Technology :** Provide support for complete Voice/Data (CISCO) Infrastructure **Role** : Technical Support Executive/Network Administrator **Key Responsibility:** Provide complete support for IT infrastructure. ➢ Handling the installation, configuration and operations of simple-routed LAN and routed WAN. ➢ Having Experience in Wi-Fi Management for Cisco and other Devices. ➢ Managing switched virtual LAN (VLAN) networks; configuration of Cisco Routers), Switches and serial interfaces, VLANs, Ethernet, static, dynamic routing and Access lists. ➢ Establishing small/medium sized networks based on the bus & star topology. ➢ Taking care of TCP/IP services, IP addressing and Subnetting. ➢ Monitor networks to ensure security and availability to specific users. ➢ Installing & configuring DHCP, DNS, Network address assignment, Internet connection and sharing. ➢ Managing the installation and configuration of LAN based on Windows platforms. ➢ Assign routing protocols and routing table configuration. ➢ Troubleshooting network related problems and PC performance issues. ➢ Determine network and system requirements.
IIHT Connecting Talent to Opportunity	**Company : IIHT Rajajinagar,Bangalore** **Duration :** Sep 2014 to May 2016 **Technology :** Provide support for complete IT Infrastructure Support **Role :** Network Admin cum Trainer **Key Responsibility:** Provide complete support for IT infrastructure ➢ Handling the installation, configuration and operations of simple-routed LAN and routed WAN. ➢ Having Experience in Wi-Fi Management for Cisco and other Devices. ➢ Managing switched virtual LAN (VLAN) networks; configuration of Cisco Routers), Switches and serial interfaces, VLANs, Ethernet, static, dynamic routing and Access lists. ➢ Provided Training for N+, CCNA (Routing & Switching), CCNP (Routing & Switching).

DECLARATION

I hereby declare that all the details furnished hereby are true to my best of my knowledge.
