ZOHAIB MUSHTAQ

Project Manager/ Environmental Scientist/Environmental Manager

Dynamic, results-oriented Environment Engineer with 15 years of experience creating and refining processes in relation to water, air, and noise pollution control, waste disposal management, improving recycling, and Oil Spill prevention strategy issues. Recognized talent for facilitating effective collaboration between environmental agency, NCEC, third party laboratories for air, water and noise monitoring. Adept at providing technical-level support for environmental projects. Expert in developing and implementing sustainable strategies that are both cost-effective and minimize long-term environmental liabilities. Hands-on experience in administering all monitoring and reporting as required by the environmental regulations and permits as per NCEC etc. Coherent in preparing, reviewing, and updating environmental investigation reports. Capability to design projects that lead to environmental protection and provide technical support for environmental projects. Tenacity to inspect industrial facilities and programs to ensure compliance with environmental regulations. Conduct thorough compliance evaluation inspections for the purpose of achieving both business and environmental goals. Proven skill in doing environmental assessment studies and a strong working knowledge of applicable regulatory programs and guidelines. I am having a strong track record of working on EIA / ESIA projects as per guidelines of Saudi Aramco, Royal Commission for Jubail and Yanbu and NCEC. I am familiar with the Saudi Aramco, Royal Commission for Jubail and Yanbu and NCEC requirements as well as International Regulations specifically IMO and MARPOL Regulations. Currently working as Project Manager Environmental Studies division with FUEL Professional Consulting and acting as the single point of contact between the client and coordinating all relevant liaison matters between the Client and the representative regulatory authorities. Additionally, I am adept at collecting, controlling, validating & interpreting environmental data ensuring its accuracy and reliability for informed decision-making purpose. Having exceptional oral and written communication skills enabling to convey complex environmental concepts and integration during the execution phase.

CORE COMPETENCIES

- Environmental Engineering
- Training & Development
- Environment compliance and assurance
- Environmental Audits
- Dredging and reclamation
- Waste Management
- Oil Spill and Mitigation Measures
- Performance Management
- Preparing Environmental reports
- Resource Management
- Strategic Planning & Execution
- Client Liaison & Performance Management
- Environmental Pollution & Control Measures
- Environmental Monitoring & Baseline Data collection
- Environmental Impact Assessment (EIA)
- Tenders & Quotations
- Team Leadership & Motivation
- Cross-functional Collaboration
- MIS Reports, Presentations
- Consulting & Project Management

PERSONAL INFO

Nationality: Pakistan

Driving License: KSA Valid Driver License

CAREER HISTORY

FUEL Engineering Consulting Environmental Studies Department – Royal Commission Project JCPDI (Jizan city for primary & downstream Industries, KSA.

Project Manager *Dec 2023 – Present*

Roles and Responsibilities:

As the Project Manager for Environmental studies consultant services Project at Royal commission, I am responsible for overseeing the successful execution of one of our most critical industrial developmental projects. My role involves comprehensive management of all team activities, ensuring that the project is delivered on time, within budget, and to the highest standards of quality and safety. In this capacity, I lead a multidisciplinary team of engineers, contractors, and safety personnel, driving collaboration and ensuring that every aspect of the project aligns with Royal commission strategic objectives. My leadership focuses on clear communication, proactive problem-solving, and maintaining rigorous safety and quality standards throughout the project lifecycle. A key aspect of my role is stakeholder engagement, where I serve as the primary point of contact

SHOLASTICS

Bachelors of Science (Environmental Science) –
University of Peshawar - KPK, Pakistan

CERTIFICATIONS/TRAININGS

- Spillage Response Awareness Training.
- COSHH Risk Assessment Training.
- ISO-14001 Environment Management System Awareness.
- LEED GA
- MOSTADAM AP
- LEED AP (ongoing)
- IEMA (ongoing)

KEY PROJECTS

- JCPDI
- Red Sea Global
- King Salman Global Maritime Industries Complex
- NEOM Oxagon Project

LANGUAGES

- ENGLISH (Advance)
- ARABIC (Intermediate)
- URDU (Advance)

for Aramco & Royal commission leadership, government authorities, and contractors. I am committed to maintaining transparency, providing regular updates, and fostering strong relationships to ensure the project's success. Under my management, the project has achieved several critical milestones, with each phase being completed on schedule and within budget. My emphasis on innovation has led to the adoption of advanced techniques that have improved efficiency and reduced costs. Additionally, I have implemented strict safety protocols, resulting in a zero lost-time incident rate, and have maintained high levels of stakeholder satisfaction through effective communication and engagement. This role has allowed me to leverage my extensive experience in project management to drive the success of the JCPDI Project, reinforcing Royal commission commitment to excellence in industrial development.

Spearheaded the design and implementation of sustainable strategies, tailoring solutions to meet the unique needs of clients and ensuring practical, innovative applications. Directed the development of eco-friendly project tools, integrating cutting-edge technologies and methodologies to enhance effectiveness and user-friendliness. Delivered expert insights on environmental assessments and energy efficiency solutions, staying ahead of the curve on the latest sustainability and energy management trends. Cultivated strong relationships within the construction sector, engaging regularly with a diverse range of stakeholders to understand and address their needs effectively. Promoted the company's sustainability services, including energy optimization, ensuring alignment with the evolving demands of clients and the wider industry. Collaborated cross-functionally with various teams to align strategies and tools with overarching business goals, ensuring a seamless flow of information and ideas. Maintained the relevance and effectiveness of strategies and tools, adapting to changing regulations, technologies, and market dynamics to uphold high standards in sustainable energy solutions.

Wood Amec Foster Wheeler Energy & Partners Engineering – AL KHOBAR, KSA

Senior Environmental Scientist, Project Manager *Jan 2023- Nov 2023*

Roles and Responsibilities:

Leading the delivery of a number of ESIA programs and supports the delivery of compliance audits for the NEOM project. Focal point of contact on projects and budgetary matters. Managing and providing technical input on ESIA studies for several developmental projects for NEOM. ESIA, ESIA Phase 1 & Phase 2, EIA for Saudi Aramco and RC projects. Preparing baseline air quality, environmental site assessment and noise reports and helping clients in understanding related issues and their mitigation. Helping clients on environmental issues by providing advisory services and expert assessment. Helping in reducing harmful impact of industrial and commercial ventures on the environment. Performing comprehensive audits for evaluating current environmental policy and management systems. Supporting the immediate project team and wider Wood Group for projects input during project proposal, award and delivery stage. Coordination with internal and external stakeholders to ensure successful and timely delivery of projects as appropriate within environmental scope. Assisting client as an advisor to all projects as required.

Atkins Realis - Umluj, KSA

Lead Project Engineer *May 2021 - Dec 2022*

Red Sea Global: Program 10, Program 12(TRSDC)

Roles and Responsibilities:

Adhering and implementing environmental management system and standards that address regulatory requirements, Company policies and initiatives. Reviewing Contractor CESMP, ESIA, MS, environmental compliance reports, pre-qualification, and surveys to ensure it has been prepared in alignment with the TRSDC framework ESIA and NCEC guidance standards. Monitoring and supervising the day-to-day construction activities on-site to ensure correct implementation of the CESMP and ESIA. Monitoring of Environmental compliances set out by the regulators, clients and the environmental laws and

regulations. Reviewing all the documents submitted by contractors for environmental discipline i.e. Contractor Weekly & Monthly Environmental Reports, Work method statements to verify environmental risk and controls are considered, contractors monitoring data submissions etc. Advising SRE, S & RE, S on interpretation. Rectification of any environment relevant NCR in compliance with the CESMP and ESIA. Investigating & reporting any significant environmental incidents to relevant regulatory authorities as may be required. Leading environmental audits, inspections, walkthrough, meeting, incident investigations, assisting and guiding the contractors' reports. Initiating environmental training needs analysis and coordinate implementation. Developing & reviewing all aspects of the Policies & procedures for the environmental management system & ensure implementation consistently across the organization. Following up closeout and maintain Environmental central action tracking registers. Participate in Environmental safety campaigns and other initiatives. Facilitate and participate in environmental risk assessments and ensure risk registers are maintained up to date. Ensuring company Environmental policies and procedures are implemented consistently and effectively. Recommending rectification of environmental non compliances before their significant impacts to the environment. Developing, implementing & compliance monitoring with CESMP/ESIA and provide guidance on local environmental regulations & guidelines. Designing & implementing SMART objective and annual master environmental activities planning to achieve them. Evaluating potential Environmental risks and develop mitigation plans. Monitoring a variety of environmental compliance efforts related to air, marine water, coral reef, mangroves, soil, Noise, turf/grass, Effluent discharge Management, waste management & migratory birds & monthly report to the client (TRSDC). Minimization of the carbon footprint at the project level

Arabian Environmental Science Ltd Company (ARENSCO) – AL KHOBAR, KSA

Environmental & Sustainability Manager *Sep 2013 - Apr 2021*

Roles and Responsibilities:

Drafting, implementing, and evaluating environmental strategies, compliance plans, and management system. Devising strategies to meet targets and to encourage best practice. Assessing, analyzing, and collating environmental performance data and reporting information to internal staff, clients, and regulatory bodies. Preparation of full EIA, ESIA studies, construction environmental management plan (CEMP) and dredging environmental management plan (DEMP). Train staff at all levels on environmental issues and responsibilities. Conducting and supervision of Environmental Monitoring activities. Preparation and implementation of Emergency spill response plan. Marine watch survey and terrestrial ecology assessment. Preparing weekly, monthly monitoring reports including data analysis and data validation. Implementing CEMP and providing guidance on local GAMEP Environmental regulations. Plan direct and coordinate soil and groundwater investigations and required remediation at company facilities and legacy sites. Manage environmental due diligence actions for company acquisitions within a team-based environment. Deploy environmental procedures and standards that address regulatory requirements and Company policies and initiatives. Served as an assistant to Lead Environmental Manager during inspections and at meetings and hearings before appropriate local state and national regulatory agencies as well as various technical committees relating to environmental matters. Administered all monitoring and reporting as required by the environmental regulations and permits. Established sampling and analysis procedures, compiling analyzing and evaluating the generated data and preparing required outlines. Participated in the development of new solutions to prevent and control public health issues. Performed Environmental audits on the industrial sites and ensured that all the environmental guidelines were followed. Collected the necessary data and recommended actions to the companies and government to protect the environment. Provided and developed a waste management plans for the industrial and construction projects and managed the

waste transfer and treatment facilities. Noise Monitoring, calculation of LAeq, LCpeak, LA10, LA90 and assessment with compliance standards.

Berkeley Engineering Consultants– AL KHOBAR, KSA

Environmental Engineer *Sep 2012 - Aug 2013*

Roles and Responsibilities:

Data validation, analysis, Interpretation and Reporting. Participated in the development of new solutions to prevent and control public health issues. Created manual regarding waste treatment, site remediation, and pollution control assessment. Prepared proposal writing, project management, project design, data analysis, and report writing for the several projects. Obtain, update, and maintain plans, permits, and standard operating procedures. Performed Environmental audits on the industrial sites and ensured that all the environmental guidelines were followed. Collected the necessary data and recommended actions to the companies and government to protect the environment. Provided and developed a waste management plans for the industrial and construction projects and managed the waste transfer and treatment facilities. Performed EIA studies of several construction and industrial projects. Implement, plan and supervise Waste Management practices. Noise Monitoring, calculation of LAeq, LCpeak, LA10, LA90 and assessment with compliance standards. Created and fully implemented the environmental management plan in compliance with regulatory requirements. Prepared risk assessments and operating permit applications, facility audit, emission source identification and emission calculations, analysis, compliance determination, and permit application. Preparing technical procedures, scope of work and method of statement. Full command on implementing US EPA, EPD, PME, RC and IFC standards. Provide consultancy service to mitigate non-conformances.

Tobishima Corporation – ABBOTABAD, PAKISTAN

Environmental Coordinator *Dec 2010 - Aug 2012*

Roles and Responsibilities:

Supervision of everyday work on site to ensure strict compliance of Environmental Protection Regulations. Overseeing waste management schemes, such as at landfill sites. Supervising the transportation of waste to ensure that it takes place efficiently without contaminating air, land, or water sources. Assisting with the development, promotion, and implementation of new waste disposal schemes. Ensuring compliance with current legislation in the transportation, handling, and disposal of waste. Formulating and controlling the budget for waste disposal. Collating statistics and compiling reports often to strict deadlines. Monitoring the quality and performance of waste services, including contract management of external providers. Assisting with the development of information and promotional materials. Dealing with enquiries and complaints from members of the public both in person and by phone or email. Conduct different water quality test. Sampling of potable water provided on sites. Environmental incident Investigation like oil spillage etc. Make and implement plan to ensure proper disposal of waste generated on site. Proper Inspection of work conditions for Environmental degradation prospective. To impart training to all workers and staff regarding the Environmental Protection Procedure. To educate the supervisor and working crew to follow safe and Environment friendly work practice. Prepare, review, and update environmental investigation and recommendation reports. Conduct Environmental meetings with Client and Site Safety Supervisors.
